

Colorize

Objective: Students continue learning Photoshop through blending modes and layers.

Instructions: Using the photo taken of them by the instructor outside of Eagles' Theatre, students desaturate the colored photo to reduce it to RGB grayscale. Students then add a layer for every item they colorize for at least six layers, including:

- | | |
|------------|-------------|
| 1. Skin | 4. Building |
| 2. Clothes | 5. Sky |
| 3. Marquee | 6. Sidewalk |

Students must flatten their image and save it as .JPG to submit.

Additional assignment:

Students make a copy of their layered document and alter their colors by:

1. Skin - Adjust using Hue/Saturation
2. Clothes - Fill with pattern
3. Marquee - Change Vibrance (noticeably different from the first version)
4. Building - Adjust using Color Balance
5. Sky - Fill with Gradient
6. Sidewalk - Add texture in FX Layer
