

Real World Motion

Objective: Students use their skills and knowledge of camera settings to control motion.

Instructions: Working with a partner, students take, at least, three photos inside and three photos outside at max zoom of 250mm for a total of six good photos.

- Person with object moving with both object and background frozen and in focus
- Person with object moving with slight-to-moderate motion blur on object, but background sharp
- Person with object moving with object frozen and in focus (Tracking), but background shows motion blur (not blur due to focus depth)

Students turn in a total of 6 photos.
